

Continental Steel Partners LLC

Regional Flat-Rolled Steel Distribution & Processing

Proposal in Response to RFP RM-2026-014 — Meridian Autoparts Inc.
Submitted: June 24, 2026

Executive Summary

Continental Steel Partners (CSP) appreciates the opportunity to bid on RFP RM-2026-014. CSP has served the Midwest automotive supply base for over 15 years from our Toledo, OH processing center. We propose to supply the Cold-Rolled Steel coil volumes in full; for 5052 Aluminum sheet, we would source through our aluminum distribution partner and pass through pricing with a fixed handling fee, as aluminum is not processed in-house at our facility.

Materials Offered & Specifications

Req #	Material	CSP Offering	Meets Spec?
REQ-01	CRS Coil	ASTM A1008 CS Type B, 0.8-2.5mm ±0.05mm	Partial (wider tolerance)
REQ-02	CRS Coil	Min. yield 270 MPa, width 900-1200mm	Partial (width capped at 1200mm)
REQ-03	Aluminum Sheet	5052-H32, 1.0-3.0mm ±0.05mm (via partner)	Yes
REQ-04	Aluminum Sheet	Mill finish, defect rate not specified	Not stated
REQ-05	Both	MTC provided; steel Type 3.1, aluminum Type 2.2	Partial
REQ-06	Both	Heat/lot traceability for steel only	Partial

Pricing

Material	Grade / Thickness Band	Price (USD/MT, FOB Toledo)	Pricing Basis
CRS Coil	0.8-1.5mm	\$905 / MT (base)	Indexed: CRU CRC Index, adj. quarterly
CRS Coil	1.5-2.5mm	\$889 / MT (base)	Indexed: CRU CRC Index, adj. quarterly
Aluminum 5052	All bands	\$3,340 / MT + \$85/MT handling	Indexed: LME Aluminum + partner margin

Delivery & Service Levels

CSP targets a 95% on-time delivery rate and a standard lead time of 12 business days for steel; aluminum lead times run 15-18 business days due to the pass-through arrangement with our distribution partner, which exceeds the RFP's 10-day requirement. An expedite option is not currently offered for aluminum. Defect/non-conformance rate for steel has averaged 0.4% over the past year. General liability coverage is \$3,000,000, below the RFP's stated minimum of \$5,000,000; CSP is willing to discuss increasing coverage if awarded the contract. A formal written business continuity plan is in development and not yet finalized.

Certifications & Compliance

CSP holds IATF 16949 certification for its steel processing operations (cert #CSP-2291). ISO 14001 certification is not currently held; CSP has an internal environmental policy but no third-party certification.

Conflict minerals reporting (Dodd-Frank 1502) is completed annually for direct-sourced steel; CSP has not yet obtained conflict minerals disclosures from its aluminum distribution partner and would need to follow up on this during contract negotiation. Steel is melted and poured domestically (Ohio, Indiana, and Pennsylvania mills, varies by lot).

Payment & Commercial Terms

Standard payment terms: Net 45 from invoice date. No early-payment discount is currently offered. CSP does not offer a formal VMI program but is open to a bi-weekly min/max replenishment model with advance notice, to be scoped separately if awarded.
