

Ferro Dynamics Trading Corp.

Global Metals Sourcing & Trading

Proposal in Response to RFP RM-2026-014 — Meridian Autoparts Inc.
Submitted: June 24, 2026

Executive Summary

Ferro Dynamics Trading (FDT) is a metals trading firm with sourcing relationships across North America and Southeast Asia. We are pleased to offer competitive pricing on Cold-Rolled Steel coil and Aluminum sheet for Meridian's Elkhart facility by leveraging our international mill network. As a trading company rather than a mill or service center, FDT does not hold physical inventory and operates on a purchase-order-to-mill-order model.

Materials Offered & Specifications

Req #	Material	FDT Offering	Meets Spec?
REQ-01	CRS Coil	Comparable to ASTM A1008, 0.8-2.5mm	Not confirmed (tolerance not stated)
REQ-02	CRS Coil	Yield strength data available on request	Not stated
REQ-03	Aluminum Sheet	5052 equivalent grade, 1.0-3.0mm	Partial (grade equivalence, not exact spec)
REQ-04	Aluminum Sheet	Surface finish not specified in this offer	Not stated
REQ-05	Both	MTC available for steel only, Type 2.1	No (wrong MTC type, aluminum missing)
REQ-06	Both	Traceability provided by originating mill only	Partial

Pricing

Item	Notes
Cold-Rolled Steel Coil	Approx. \$860-910 / MT depending on mill allocation at order time
Aluminum 5052 Sheet	Approx. \$2,950-3,050 / MT depending on origin
Pricing basis	Spot pricing confirmed at time of each purchase order; no fixed or published index
Minimum order quantity	500 MT per SKU per order

Delivery & Service Levels

FDT targets on-time delivery of 90-93% given reliance on ocean/rail freight from overseas mill partners for a portion of volume. Standard lead time is 4-6 weeks for imported material and 3 weeks for domestically sourced allocations; no expedite option is offered. Defect/non-conformance rate is not tracked in aggregate across FDT's supplier network and would need to be assessed per shipment. Liability insurance certificate available upon request; specific coverage amount not included in this proposal. No business continuity plan was provided.

Certifications & Compliance

Certification status varies by originating mill and is not centrally documented by FDT; specific mill certifications (IATF 16949, ISO 14001) can be requested on a per-order basis once a mill is allocated. Conflict minerals disclosure is not addressed in this proposal. Country of melt/pour varies by order and may include non-domestic mills, which may not satisfy Buy America / regional content requirements without further verification.

Payment & Commercial Terms

Payment terms: 30% deposit at order confirmation, balance Net 30 from delivery. No VMI, consignment, or inventory-holding arrangement is offered under the trading model described above.
